

SCREEN WASH

CONCENTRATED, HIGH STRENGTH CLEANING FLUID FOR GLASS

PART OF THE PROFESSIONAL CLEANING RANGE

A concentrated cleaning additive for screen wash resevoirs in cars, vans and lorries. Winter grade so will not freeze in cold temperatures.

Uses: Clears grime, traffic films and insects from windscreens and windows. frozen ice quickly and safely. Used neat, Concentrated Screen Wash has improved cleaning power. Or, dilute the liquid to help it go further.

Benefits:

- Concentrated formula for superior cleaning.
- Prevents water jets from freezing.
- Non-smear formulation.
- Effective down to -15°C (when used neat).

More effective than plain water as the chemicals in the screenwash prevent water stagnation and hinders bacterial development, making fungal growths and mould far less likely within the reservoir.

Using a screenwash is also beneficial for the windscreen washer systems in freezing temperatures. Not only is it an issue in that you can't clean your screen at these temperatures if your resevoir just contains water, but the

freezing and thawing of the water in the delicate hoses can cause cracks and splits to occur in the system.

SPECIFICATION SUMMARY

DILUTION RATE		
Concn.	Water	Effective to
100%	0%	-15°C
20%	80%	-5°C
Flammability	Flammable	
Flash point	~18°C (lit. value)	
pH	5.5	
Solubility in water	100%
