# DE-ICER

## Frost and Ice Buster for Frozen Windscreens

### PROFESSIONAL CLEANING RANGE

#### Description:

*A spray applied de-icer with a concentrated formula to quickly defrost windscreens and frozen glass surfaces.*

#### Benefits:

- Quickly clears frost and ice from vehicle windows.
- Prevents refreezing.
- Works down to -15°C.
- Non-smear formula.

#### Uses

De-icer quickly melts ice and frost formed during cold weather, with minimal risk of causing damage to your vehicle. De-icer spray can also be used to free the rubbers of your wiper blades in freezing conditions; this is particularly useful on vehicles fitted with automatic windscreen wipers, reducing strain on the wipers and their moving parts when the engine is started.

#### Directions

1. Remove any loose snow from the windscreen with a scraper.
2. Spray from top of windscreen working downwards.
3. Once ice has melted, activate windscreen wipers.
4. Remove any excess overspray.

#### Container Size

750ml plastic spray bottle.

#### Colour

Pigmented blue.

#### Storage Conditions

Keep bottle tightly closed. Store in an upright position below 25°C.

#### Disposal of Containers

Do not leave empty containers where residue could be harmful to children, animals or the environment. Remove any bags or material to a central disposal point in accordance with local regulations.

#### Caution:

It is an offence to drive without properly defrosting or demisting your vehicle and the police can fine you for relying on 'porthole vision' - where drivers leave a gap big enough to see out of but not the whole windscreen.

Using a vehicle with parts or accessories in a "dangerous

condition" could result in a fine of £60 and three penalty points.

#### Health & Safety

Please refer to separate material safety data sheet for full handling, use and storage instructions. Keep out of reach of children. It is the users responsibility to determine suitability for use. If in doubt contact our Technical Department for advice.

**Note: this information is for general guidance only, since site conditions and labour are beyond our control. It is recommended that users make their own tests to determine suitability.**

## Specification Summary

Flammability	Flammable
Flash point	~22.5°C (lit. value)
pH	5.15
Solubility in water	100%
