SCREEN WASH

Concentrated Cleaning Solution for Automotive Use

PROFESSIONAL CLEANING RANGE

Description:

Cleaning additive for screen wash resevoirs in cars, vans and lorries. Winter grade so will not freeze in cold temperatures.

Benefits:

- Concentrated formula - use neat for enhanced cleaning power or dilute as required.
- Clears grime, traffic film and insects .
- Prevents water jets from freezing.
- Non-smear formulation.
- Effective down to -15°C.

Uses

Screenwash is an essential addition for any vehicle to ensure your windscreen is kept clear whilst driving. Whether in summer or winter, making sure your washer fluid is always topped up and ready to keep your windscreen clean will ensure you won't have any problems with dirt, grime or insects obscuring your view of the road.

More effective than water alone as the chemicals in the screenwash prevent water stagnation and hinders bacterial development, making fungal growths and mould far less likely within the reservoir.

Using a screenwash is also beneficial for the windscreen washer systems in freezing temperatures. Not only is it an issue in that you can't clean your screen at these temperatures if your reservoir just contains water, but the freezing and thawing of the water in the delicate hoses can cause cracks and splits to occur in the system.

Directions

1. Pour required amount into screen wash reservoir.
2. Top up with water to desired concentration level.
3. Remove any screen wash accidentally spilt on to paintwork.

Used neat, concentrated screen wash has improved cleaning power. Or, dilute the liquid to help it go further:

Concn.	Water	Effective to
100%	0%	-15°C
20%	80%	-5°C

Container Size

5L plastic bottles.

Colour

Pigmented pink.

Storage Conditions

Keep bottle tightly closed. Store in an upright position. Storage temps

Disposal of Containers

Do not leave empty containers where residue could be harmful to children, animals or the environment. Remove any bags or material to a central disposal point in accordance with local regulations.

Health & Safety

Please refer to separate material safety data sheet for full handling, use and storage instructions. Keep out of reach of children. It is the users responsibility to determine suitability for use. If in doubt contact our Technical Department for advice.

Note: this information is for general guidance only, since site conditions and labour are beyond our control. It is recommended that users make their own tests to determine suitability.

Specification Summary

Flammability	Flammable
Flash point	~18°C (lit. value)
pH	5.5
Solubility in water	100%
